**By K B Napier**

## **A Travesty of Theology and Overt Green Propaganda**

The Green Bible has been rolled out by people desperate to make green things happen! However, it is not just a Bible - the Bible part is sandwiched between two other sections containing some of the worst theology I have ever read. This book examines those two surrounding sections, showing that they contain nothing but propaganda and very bad theology. The author's argument is built upon his previous three books, all of which prove that global warming, climate change and CO2 arguments are all fake science.

**First Edition: September 2011**
