

The inherent danger in promoting homosexuality to children

Written by Administrator

Here is an extract from a letter written by a penitent child molester who has been in prison for the past 10 years (USA) referring to the *"danger inherent in promoting homosexuality (the pro-homosexual agenda) to impressionable children"* in schools. He wrote:

*"When the public school system pushes a pro-homosexual agenda on to young children and says it's okay for two men or two women to fall in love and live just like a married man and woman, they're unwittingly helping the pederast with the grooming process. They're not making children any safer. They're putting at least the boys at a greater risk. Why? Because school teachers—the most influential people in most children's lives—are telling them that being "gay" isn't anything bad. A pederast who lives in an area where a pro-homosexuality agenda is promoted in the public school systems will know this is being taught and **will not hesitate in the least to use this to groom and manipulate the boy he wants to molest into a sexual encounter. It's a foundation (the pro-homosexual agenda) the pederast can and will build upon*** (emp. added). ([Apologetics Press, 2011](#))

The [UK government, local authorities and head teachers are setting up your children in schools](#) to be molested by peadophiles and homosexuals. Equality, diversity, discrimination and all the other evil nonsense is all a carefully crafted smoke screen to condition children to be open and amenable to being molested and encouraged to be 'fresh meat' for [homosexuals to infect with their death cult](#)
